About MundaMurra

MundaMurra Pty Ltd (MundaMurra) is a 100% Aboriginal owned and managed company, delivering pipelines, rail, utilities, civil and mining services. Owner and Managing Director Stewart Drage established the company in early 2020. Stewart is a Nyiyaparli Traditional Owner.

MundaMurra was established to offer a quality Aboriginal service provider in the mining and resources sector. Drawing from personal experience working and living in the Pilbara, MundaMurra is committed to delivering quality results while providing meaningful opportunities for Aboriginal people.

Key People

Stewart Drage Community Engagement Specialist

Stewart is a respected member of the Pilbara Aboriginal community with extensive business management expertise. He has lived and worked throughout the Pilbara and Gascoyne regions in the mining, pastoral and government sectors as well as managing the operations of an Aboriginal contracting business.

As a member of the Nyiyaparli language group, Stewart's traditional country covers Newman, the Chichester Ranges, Marillana, Cloud Break, Christmas Creek, Roy Hill, Yandicoogina and Hope Downs.

Stewart maintains close family and business connections with many of the indigenous communities of the wider Pilbara region including the Banjima, Nyiyaparli, Innawonga, Nymal and Martu peoples.

Bryce Mongoo Land Management Division Manager

Bryce Mongoo (Wadjarri/Nhanda) is passionate advocate for Indigenous empowerment through connection to Country, education, and employment.

With a background spanning mining, construction, environmental approvals, land management, and education, Bryce brings cultural integrity and strategic insight to every initiative. He has built a career focused on creating meaningful, long-term outcomes for Indigenous Australians, underpinned by strong community relationships and deep cultural knowledge.

Bryce is skilled in stakeholder engagement and heritage management, and holds qualifications in Mentoring & Leadership and Conservation & Land Management. His work promotes culturally safe, strengths-based approaches to collaboration and community resilience.

Vegetation Management & Monitoring

MundaMurra Land Management delivers targeted weed control and vegetation management solutions across mine sites, transport corridors, and industrial infrastructure. Our integrated approach combines on-ground expertise with mapping and monitoring to ensure effective, compliant, and sustainable outcomes.

Our Services Include:

- ➔ Short- and long-term weed control programs tailored for mining, rail, road, and port operations
- ➔ Multiple treatment methods: selective herbicide application, mechanical removal, mulching, and manual techniques
- ➔ Vegetation maintenance in fire-prone and sensitive operational areas
- ➔ Rapid mobilisation for urgent or small-scale projects, including remote locations
- ➔ Trained and certified crews working to strict safety and compliance standards
- ➔ Regular treatment reporting for transparency and progress tracking

Mapping, Monitoring & Management Planning:

- ➔ GIS/GPS-based weed mapping to identify species, density, and distribution
- ➔ Site-specific weed management plans aligned with operational and environmental goals
- ➔ Seasonal and post-treatment monitoring programs
- ➔ Customised client and regulatory reporting
- ➔ Integration of Traditional Owner knowledge and cultural values

Environmental Rehabilitation

We assist in restoring disturbed areas through practical, culturally informed rehabilitation practices that ensure long-term ecological and social benefits. Our services include:

- ➔ Land preparation, topsoil management, and erosion control
- ➔ Use of local native seed, saplings, and other organic material for revegetation
- ➔ Construction and support for community-led nurseries producing native species
- ➔ Joint implementation of rehabilitation plans with ranger groups and Native Title holders
- ➔ On-ground project delivery including planting, watering, and monitoring
- ➔ Social and cultural return through training and employment of local community members

Flora & Fauna Surveys

MundaMurra supports the delivery of comprehensive terrestrial assessments in collaboration with highly qualified environmental scientists and ecologists.

- ➔ Reconnaissance, targeted, and detailed flora surveys conducted at ecologically appropriate times
- ➔ Support for fauna surveys including trapping, monitoring, habitat analysis, and relocation of priority species
- ➔ Participation in data collection, mapping, and reporting with a focus on cultural and ecological integrity
- ➔ Community engagement and cultural understanding to support survey work on Country
- ➔ Assistance with logistical planning, field mobilisation, and coordination
- ➔ Input into biodiversity monitoring and conservation planning initiatives

Environmental Labour Hire

Our team includes entry-level and skilled field personnel trained in practical, on-Country conservation work. We provide hands-on support across a wide range of environmental and land management activities.

- ➔ General environmental labour for rehabilitation, weed control, fencing, and revegetation
- ➔ Manual labour including brush cutting, spraying, seed spreading, tree planting, and mulching
- ➔ Fence installation and maintenance to manage grazing impacts and protect sensitive areas
- ➔ Firebreak construction, fire fuel load reduction, and support for prescribed burning preparation
- ➔ Support for erosion control projects, gully stabilisation, and topsoil spreading
- ➔ Installation and maintenance of water points and wildlife monitoring stations
- ➔ Training and mentoring pathways for local Indigenous workers in conservation fieldwork

Organisational Values

AT MUNDAMURRA, OUR NAME REFLECTS OUR PURPOSE

In the traditional Nyiyaparli language, MundaMurra means “**hardworking hands**,” which, combined with our mission of **strengthening communities**, defines both what we do and how we do it.

Our core values are built around the principle of being **STOIC**:

Safety,
Teamwork,
Opportunity,
Integrity, and
Community.

These values guide our actions, inform our decisions, and shape how we support each other, our clients, and our community.

To us, being STOIC is more than just resilience. It's about taking responsibility, working together with purpose, creating opportunities, and striving for continuous improvement in every situation.

SAFETY

Health and wellbeing are the foundation guiding every decision, every task, every day.

TEAMWORK

We are stronger together, we succeed together through collaboration, with respect and shared purpose.

OPPORTUNITY

Creation of meaningful pathways through action and empowerment of all.

INTEGRITY

Commitment to quality, continually improving standards, working toward solutions, and taking ownership of outcomes.

COMMUNITY

Strengthening communities, respecting country and leaving a lasting positive impact.

Other Capabilities

In addition to its core expertise in land management, MundaMurra offers a broad range of complementary services across construction, infrastructure, environmental management, and community development. With a skilled, multi-disciplinary team and a strong focus on safety, quality, and cultural integrity, MundaMurra delivers tailored solutions that support integrated project outcomes across Western Australia, including:

➔ Project Management & Engineering

We provide expert project management and engineering services for mining infrastructure, shutdown maintenance, and commissioning.

➔ Renewable Energy

Delivering complete construction solutions for fixed plant renewable energy infrastructure, supporting clients from planning through to execution.

➔ Dewatering

MundaMurra has extensive experience in the installation, removal, and maintenance of dewatering bores across the Pilbara region.

➔ Electrical

We deliver high-voltage electrical works to the highest industry standards, backed by qualified personnel and proven experience.

➔ HDPE Construction

Our team specialises in the construction of high-density polyethylene (HDPE) pressure piping systems for mining and industrial applications.

➔ MSCL Pipeline Construction

MundaMurra constructs mild steel concrete-lined (MSCL) pipelines with the skill and efficiency required for remote and large-scale projects.

➔ Building

We design, supply, and install modular buildings and accommodation units, with fully engineered plans and tailored support services.

➔ Fencing

Supply and install of fencing solutions to meet site-specific requirements and Australian Standards for mining and resource projects.

➔ Safetrack Products & Services

We deliver full-service rail infrastructure works, including construction, maintenance, structural repairs, and specialist plant supply across rail environments.

➔ Tank Construction

MundaMurra constructs steel tanks for industrial use, with experience in delivering quality installations to meet project and safety standards.

➔ Power & Lighting Supply

MundaMurra Power brings locally operated, high-standard hire solutions to the Pilbara, supporting clients with quality, mine-ready equipment such as generators and lighting towers.

➔ Quarry Products

Pilbara Quarries supplies quality quarry products and civil support services tailored to the unique needs of the Pilbara region.

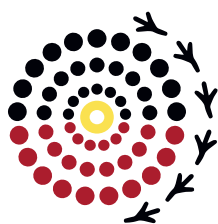

➔ Mining Supplies

MundaMurra Mining Supplies offers high-performance, eco-friendly engine products such as coolants and flushes, backed by expert support and service.

➔ Scholarships

We fund a four-year training, mentoring, and financial support program to develop emerging Pilbara business and community leaders.
