About MundaMurra

MundaMurra Pty Ltd (MundaMurra) is a 100% Aboriginal owned and managed company, delivering pipelines, rail, utilities, civil and mining services. Owner and Managing Director Stewart Drage established the company in early 2020. Stewart is a Nyiyaparli Traditional Owner.

MundaMurra was established to offer a quality Aboriginal service provider in the mining and resources sector. Drawing from personal experience working and living in the Pilbara, MundaMurra is committed to delivering quality results while providing meaningful opportunities for Aboriginal people.

Certified Karlka Business

Key People

Stewart Drage Community Engagement Specialist

Stewart is a respected member of the Pilbara Aboriginal community with extensive business management expertise. He has lived and worked throughout the Pilbara and Gascoyne regions in the mining, pastoral and government sectors as well as managing the operations of an Aboriginal contracting business.

As a member of the Nyiyaparli language group, Stewart's traditional country covers Newman, the Chichester Ranges, Marillana, Cloud Break, Christmas Creek, Roy Hill, Yandicoogina and Hope Downs.

Stewart maintains close family and business connections with many of the indigenous communities of the wider Pilbara region including the Banjima, Nyiyaparli, Innawonga, Nymal and Martu peoples.

Warrick Leeson

Projects Division Manager

Warrick Leeson is a highly experienced project and construction manager with a proven track record delivering complex mining, civil, and infrastructure projects across Australia and PNG.

With expertise spanning procurement, contract management, HSE leadership, stakeholder engagement, and strategic business development, Warrick has successfully led major works for clients including Rio Tinto, Roy Hill, and Worley. His hands-on leadership style, deep technical knowledge, and commitment to safety and quality ensure projects are delivered on time, on budget, and to the highest standards.

Warrick's collaborative approach fosters strong client relationships and drives successful outcomes across all stages of project delivery.

Project Management & Engineering

MundaMurra has the vast experience providing Engineering & Project management of Mining infrastructure construction projects, shutdown maintenance activities and commissioning works.

Electrical Contractor License - EC15409

Plumbing License – TL11743

MSCL Accreditations and Asbestos Certifications

Our project management capabilities & experience also include:

- ➔ Conducting Design, HazID and Risk Workshops for Detailed Design and Construct Works with the Client.
- ➔ Undertaking Construction Feasibility studies (existing infrastructure & conditional reporting)
- ➔ Providing Tender Budget Estimate Costing
- ➔ Undertake Project Level 2 Risk Assessments & Workshops (L2RA) with Client Safety Representatives.
- ➔ Project Scheduling & Client Reporting (PPPC)
- ➔ Site Quality Assurance Engineering (MDR's, Dossiers, ITP's, ITC's – Hexagon CCMS & Completion systems experience.
- ➔ Commissioning of Dewatering Process Systems Equipment

Renewable Energy

The MundaMurra project team area a multi discipline workforce who are highly skilled and experienced in all elements required for the successful construction of client planned Renewable Energy Fixed Plant Infrastructure.

Our team possess skilled experience in:

- ➔ Project Management
- ➔ High pressure gas & water piping installations
- ➔ Ancillary Valve Fittings Fabrication & Installation
- ➔ Gas Compression Infrastructure & Piping
- ➔ Water Treatment Plant Infrastructure
- ➔ Modular & Fixed Plant Renewable Energy Design, Supply & Installation
- ➔ Solar Panels, Electrical Cable & Instrumentation Installation & Testing
- ➔ Pneumatic & Hydrostatic Testing
- ➔ Steel Tank Construction
- ➔ Buildings & Facilities Supply & Install

Extensive experience delivering quality & complex installations across multiple disciplines showcases the MundaMurra team's capability to offer a complete & unique service for your Renewable Energy Requirements.

- ➔ Supply & install a range of Hydrogen, Solar, Battery & Hybrid power generation units ranging from 5 - 100KW which are scalable and built to order depending on your requirements and preferences.
- ➔ Supply & install modular Hydrogen production units which can be amalgamated with renewable energy modules to provide turn-key zero emission solutions.

We have the experience and resources required to successfully install, test and commission Renewable Energy Infrastructure Integral for fixed Hydrogen Plant Construction from high pressure gas & water piping systems for feedstocks & treatment to electrical installations and connections vital for Electrolysers, instrumentation & automation.

MundaMurra tailors energy solutions to suit your site's unique needs, supporting your energy transition.

Dewatering

The MundaMurra project team have extensive experience in the installation and removal of bores throughout the Pilbara region.

Our team specialises in the following Bore Install services:

- ➔ Downhole submersible pump installations
- ➔ Wellmaster, Crusader, PermaGlass (FRP) installations
- ➔ Cable jointing, terminations and testing
- ➔ Remote Telemetry and Controls
- ➔ Remote (Generator) and HV-LV Power Connections
- ➔ Existing Bore inspection and condition reporting
- ➔ Headworks supply and install
- ➔ Bermad and Amiad valve installations, configurations and application selection
- ➔ Bore pads, supports, skid, pipeline and compound fencing

Electrical

MundaMurra has the required skills, knowledge, equipment and experience to deliver HIGH VOLTAGE projects to the highest quality standards across multiple industry sectors.

Our service offering includes:

- ➔ Feasibility studies, design and design modifications
- ➔ High voltage systems and equipment
- ➔ Control systems and Instrumentation
- ➔ Detailed power system studies
- ➔ Harmonic filter design
- ➔ Renewable Energy Solutions
- ➔ Customised training
- ➔ Equipment rental

Condition monitoring enables us to:

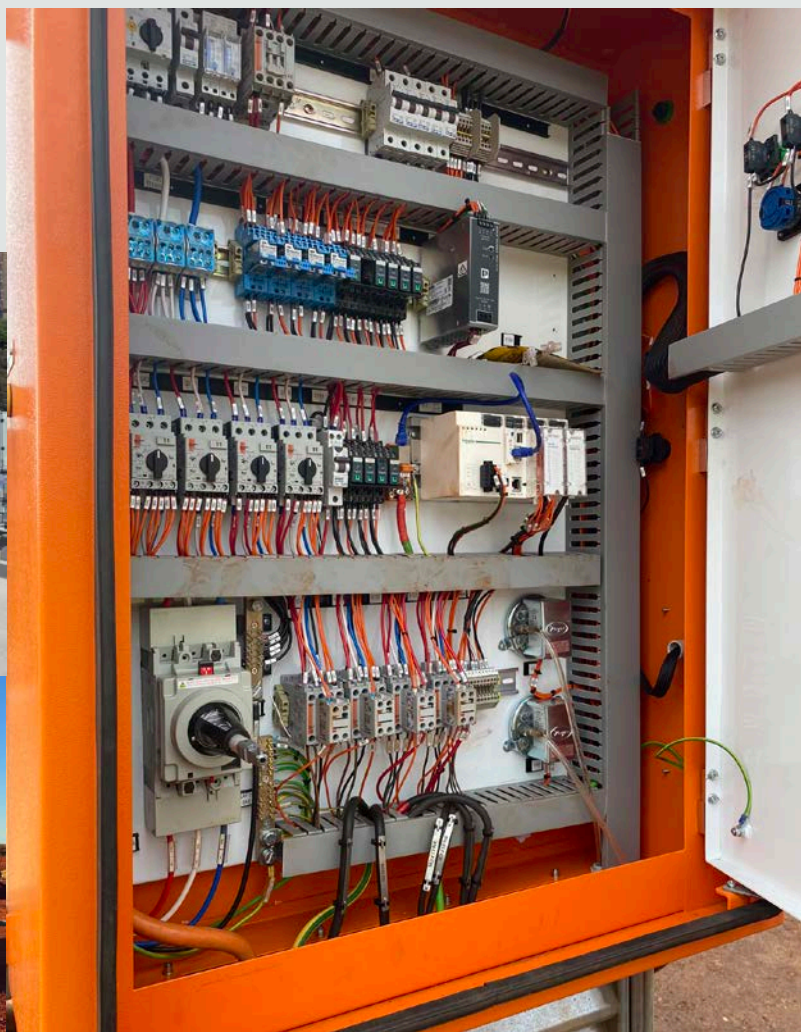

- ➔ Understand our clients requirements and operational philosophy
- ➔ Identify high risk assets (Single Point of Failures)
- ➔ Optimise the performance of critical assets whilst eliminating unplanned plant downtime
- ➔ Provide asset health reports
- ➔ Recommend actions are based priorities
- ➔ Support predictive maintenance.
- ➔ Update system models
- ➔ Refinement of maintenance strategies.

GENERAL ELECTRICAL:

- ➔ HV / LV Construction & Maintenance
- ➔ HV / LV Cable Terminating & Jointing
- ➔ Motor Control Centre (MCC) Installation, Commissioning
- ➔ Stand Alone Hybrid Energy Systems
- ➔ Pit & Pipe Installation & Cable Hauling
- ➔ Pre-Commissioning, Functional Testing & Operations Start Up

TELEMETRY/INSTRUMENTATION:

- ➔ Instrumentation & Control Design, Installation and Verification
- ➔ Process Automation DCS, PLC, SCADA, P&ID
- ➔ Instrumentation Cable Installation, Termination
- ➔ Structured Cabling Cat6, 6A, Cat7, UTP, STP, FSTP Installation & Certification
- ➔ PTP Wireless Network Installation & Certification.

HDPE Construction

The MundaMurra project team are a multi discipline workforce who are highly skilled and experienced in the construction of High-Density Polyethylene (HDPE) pressure piping systems.

Our team specialises in the following HDPE Services:

- ➔ HDPE Butt Welding and Electro Fusion
- ➔ Ancillary Valve Fittings Fabrication and Installation
- ➔ Hydrostatic and In-service Leak Testing
- ➔ Pipeline Conveyor, LV and HME Trafficable Road Crossing (Buried) Installations and HDD Crossings.
- ➔ Condition Investigation reports and Technical Advice.
- ➔ HDPE Liner Repairs and Installations
- ➔ Valve selection, installation and maintenance

We have the experience and resources to coordinate and execute projects which require design, drafting, estimating, scheduling, fabrication, non-destructive testing, hydrostatic testing, surface treatment and site installations

Our site capabilities include the delivery and installation of pressure piping, complex pipe spool fabrication and commissioning of extensive Pipeline Systems to the Clients standard requirements

MundaMurra Projects are executed and completed in accordance with project specifications, Australian Standards & Codes and relevant Statutory Governing regulations

MSCL Pipeline Construction

The MundaMurra project team area a multi discipline workforce who are also highly skilled and experienced in the construction of Mild Steel Concrete Lined Pipelines.

Our team specialises in the following services:

- ➔ Accredited Handlers and pipe layers of Mild Steel Cement Lined (MSCL) Pipe
- ➔ Design, Fabrication & Installation of MSCL Pipelines – including pipe supports, thrust blocks and associated civil work
- ➔ QA, Commissioning and Maintenance of MSCL Pipeline
- ➔ Hydrostatic and In-service Leak Testing
- ➔ Steel Pipeline LV & HME Trafficable Road Crossing (Buried) Installations and HDD (Horizontal Directional Drilling) Under bore Installations

The MundaMurra Project team have the capability to handle a full range MSCL pipeline arrangements.

Our site capabilities include a range of applications inclusive of Remote Site Mobilisation, Coded Welders, VOC requirements, HSE Risk Management, Site Delivery, On-site Welding & Fabrication, Mechanical Plant Installation, Emergency Shutdowns and Repair Works

MundaMurra Projects has the experience, specialist resources and external partners needed to successfully deliver projects in accordance with Client specifications, Australian Standards & Governing Codes.

Tank Construction

The MundaMurra project team area a multi-discipline workforce who are highly skilled and experienced in the construction of Steel tank installations.

The MundaMurra Project team has the capability to handle a range of tank sizes for different water needs – As well as all associated civil, mechanical and electrical work for pump stations and instruments

MundaMurra Projects has the experience, specialist resources and external partners needed to successfully deliver projects in accordance with Client specifications, Australian Standards & Governing Codes.

Our team specialises in the following Services:

- ➔ Installation of steel tanks for raw or potable water storage
- ➔ Installation of HDPE Liner within tank – primarily for potable water storage
- ➔ Installation of stairs, access points, walk-ways, and ladders
- ➔ Installation of tank instrumentation such as level indication, ventilation, and side wall access holes.
- ➔ All civil work needed for tank preparation. Including ring beams and any concrete work.
- ➔ QA, Commissioning and Maintenance of tanks.
- ➔ Hydrostatic Testing.
- ➔ Steel/HDPE Pipelines on both inlet and outlet of tanks.

Organisational Values

AT MUNDAMURRA, OUR NAME REFLECTS OUR PURPOSE

In the traditional Nyiyaparli language, MundaMurra means “**hardworking hands**,” which, combined with our mission of **strengthening communities**, defines both what we do and how we do it.

Our core values are built around the principle of being **STOIC**:

Safety,
Teamwork,
Opportunity,
Integrity, and
Community.

These values guide our actions, inform our decisions, and shape how we support each other, our clients, and our community.

To us, being STOIC is more than just resilience. It's about taking responsibility, working together with purpose, creating opportunities, and striving for continuous improvement in every situation.

SAFETY

Health and wellbeing are the foundation guiding every decision, every task, every day.

TEAMWORK

We are stronger together, we succeed together through collaboration, with respect and shared purpose.

OPPORTUNITY

Creation of meaningful pathways through action and empowerment of all.

INTEGRITY

Commitment to quality, continually improving standards, working toward solutions, and taking ownership of outcomes.

COMMUNITY

Strengthening communities, respecting country and leaving a lasting positive impact.

Other Capabilities

In addition to its core expertise in land management, MundaMurra offers a broad range of complementary services across construction, infrastructure, environmental management, and community development. With a skilled, multi-disciplinary team and a strong focus on safety, quality, and cultural integrity, MundaMurra delivers tailored solutions that support integrated project outcomes across Western Australia, including:

➔ Building

We design, supply, and install modular buildings and accommodation units, with fully engineered plans and tailored support services.

➔ Fencing

Supply and install of fencing solutions to meet site-specific requirements and Australian Standards for mining and resource projects.

➔ Controls

Supplying the SafeTrack range of advanced cable connection systems, lightning protection, rail tools and measuring instruments, rail machines, and the Railmonitor digital service platform across rail, water/waste, oil/gas, and construction industries.

➔ Tank Construction

MundaMurra constructs steel tanks for industrial use, with experience in delivering quality installations to meet project and safety standards.

➔ Power & Lighting Supply

MundaMurra Power brings locally operated, high-standard hire solutions to the Pilbara, supporting clients with quality, mine-ready equipment such as generators and lighting towers.

➔ Land Management

MundaMurra Land Management provides culturally sensitive vegetation management, environmental rehabilitation services; and flora and fauna surveys along with environmental labour hire.

➔ Quarry Products

Pilbara Quarries supplies quality quarry products and civil support services tailored to the unique needs of the Pilbara region.

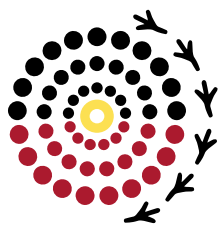

➔ Mining Supplies

MundaMurra Mining Supplies offers high-performance, eco-friendly engine products such as coolants and flushes, backed by expert support and service.

➔ Scholarships

We fund a four-year training, mentoring, and financial support program to develop emerging Pilbara business and community leaders.
